August 2023

## Market Commentary

### Money Market

Banking system liquidity was less buoyant in August, albeit positive, to average c. N239.20 billion vs c. N503.72 billion recorded in July. This comes off the back of reduced inflows from OMO maturities and bond coupon payments in the month at c. N76.92 billion vs N222.34 billion in July 2023. Consequently, the average Open Policy Rate (OPR) and Overnight Rate (O/N) rose to 10.52% and 11.13% from 5.39% and 5.90% month-on-month, respectively. The Central Bank of Nigeria (CBN) conducted two Primary Market Auctions during the month and issued N457 billion across all tenors. Average stop rates for the 91-day, 182-day and 364-day papers closed at 5.10%, 6.95% and 11.885% from 4.43%, 5.75% and 9.045% respectively, the previous month.

### Fixed Income

Bearish trading sentiments were sustained in the Nigerian fixed income market during the month. This comes off the back of sustained impact of the rise in the Monetary Policy Rate (MPR) to 18.75% from 18.50% by the Monetary Policy committee the previous month. This led to a 0.99% rise in the average yield levels month-on-month. The Debt Management Office (DMO) offered the April 2029, June 2033, June 2038 and June 2053 maturities at the monthly Primary Market Auction (PMA), offering N360 billion across the tenors. The auction attracted a total bid of N312.56 billion. However, N230.26 billion was allotted, including non-competitive allotment. The marginal stop rates for the 2029, 2033, 2038 and 2053 maturities rose to 13.85%, 15.00%, 15.20% and 15.85% from 12.50%, 13.60%, 14.10% and 14.30% respectively, in July 2023.

### Equities

The Nigerian equities market sustained its positive performance in the month, as a result, the NGX All Share Index gained +3.44% in August to close at 66,548.99 points, with year-to-date performance standing at +29.85%. The NGX Consumer Goods, Insurance, Oil and Gas and Industrial Goods indices reported positive performances, growing +24.51% (1,063.00 points), +3.08% (268.76 points), +0.91% (939.87 points) and 0.57% (2,860.45 points) respectively, while the NGX Banking indices lost -3.57% (646.29 points).

## Market Outlook

Bullish sentiments were sustained in the Nigerian stock market in the month, due to positive equity prices fueled by increased interest in Consumer Goods and Oil and Gas stocks. We expect the performance in the equities market to be influenced by macroeconomic fluctuations. However, with most Nigerian stocks currently at record highs, we expect investors to take profit.

### PERFORMANCE REVIEW

The EAMMF returned an average of 12.60% in August, significantly higher than its benchmark, 91-days T-Bill, which averaged 5.10% and higher than July's average yield of 12.51%. This positive performance (relative to the benchmark) was largely supported by investments in high yielding CPs, fixed term deposits, and higher T-Bill reinvestment yields. In the near term, we expect mild growth in the net yield, on expectation of a decline in current fixed income security yields.
